NOLO SLOWLOW activity is a 'marble run' with a difference. Using only paper and sticky Tak (Or tape) participants have to devise the SLOWEST run for a table tennis ball from the top of a vertical surface to the ground. Windows are ideal for this

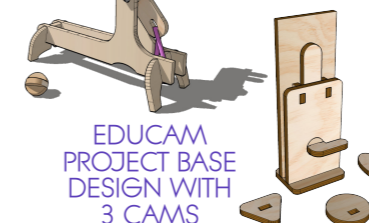

Tubes work well, but they can also try buckets, scoops, jumps. Because the table tennis ball is so light, there is a need to have enough momentum to keep the ball rolling, but as slowly as possible

NOLO AJBOX ACTIVITIES EXPLORE STEM USING 'NO OR LOW COST' MATERIALS

AJBOX.CO.UK sells a wide range of unique low cost STEM Educational kits which pop-out and push together to make fully working mechanical mechanisms

No workshops or tools required! Each comes with extensive free Educational Resources
